Invest in Zurich Investment-Linked Funds Today!

You can invest in any one or combinations of Zurich investment-linked funds through the purchase of any one of our investment-linked plans. The following funds are available to suit your investment objectives, risk profiles and investment horizons:

Malaysian Funds

Name of Fund	Zurich Growth Fund	
Features of Fund		
Investment Objective	The Zurich Growth Fund ("The Fund") is an equity fund, which aims to provide capital appreciation over the medium to long-term, through a diversified, growth-oriented equity portfolio.	
Investment Strategy & Approach	The Fund invests predominantly in Malaysian equities and equity-related securities, with above-market average growth potential. The Fund adopts an active asset allocation strategy, and invests in a diversified equity portfolio using a combination of top-down, bottom-up, fundamental, quantitative and technical methods. The Fund may also invest a portion of the portfolio in fixed income securities, cash and short-term money market instruments, for capital preservation.

<b>Name of Fund</b>	<b>Zurich Vulture Fund</b>	
<b>Features of Fund</b>		
<b>Investment Objective</b>	The Zurich Vulture Fund ("The Fund") is an aggressive equity fund, which aims to provide capital appreciation over the short to medium-term, by looking for potential trading and other investment opportunities.	
<b>Investment Strategy &amp; Approach</b>	The Fund invests predominantly in Malaysian equities and equity-related securities that are seen as undervalued for longer-term investment, or have potential for short-term trading opportunities. The Fund adopts an aggressive asset allocation strategy, and invests in a diversified equity portfolio using a combination of top-down, bottom-up, fundamental, quantitative and technical methods. The Fund may also invest a portion of the portfolio in cash and short-term money market instruments for capital preservation.

Name of Fund	Zurich China Edge Fund		
Features of Fund			
Investment Objective	The Zurich China Edge Fund (“The Fund”) is an equity fund, which aims to provide capital growth over the medium to long-term, through investment in equity and equity-related securities (China equities) of companies which are headquartered and/or listed in or have a substantial business exposure to the People’s Republic of China.		
Investment Strategy & Approach	The Fund will invest its assets in the Schroder International Selection Fund (ISF) - China Opportunities (“The Underlying Fund”) for exposure to China equities. The Underlying Fund uses an active fundamental investment strategy to invest in China equities. Within this strategy, Schroder Investment Management Limited (“Schroder”) places primary emphasis on their capability to generate investment insights through bottom-up research leveraging on the extensive investment expertise in the region.		
Asset Allocation	Asset Class	Range (% of NAV)

• Fee Structure	The Fund Management Fee is calculated when the unit prices are determined and charged against the Fund. The Fund Management Fee will be at a maximum of 1.50% per annum of the total gross investments of the Fund, levied daily. There is no double counting of management fees between the Fund and the iShares Core S&P Total U.S. Stock Market ETF, as the Fund Management Fee is charged only once in the unit price.

Name	Zurich Health Care Fund														
Features of Fund															
Investment Objective	The Zurich Health Care Fund (“The Fund”) is an equity fund, which aims to provide capital growth over a longer term period by investing in equity and equity-related securities of health care companies based in the United States and other countries.														
Investment Strategy & Approach	The Fund is a ‘feeder’ fund that will invest its assets in the Vanguard Health Care Fund for exposure to companies principally engaged in the development, production, or distribution of products and services related to the health care industry based in the United States and other countries. The Fund also considers companies engaged in medical, diagnostic, biochemical, and other research and development activities.

**Risks**

- The Fund's unit price may go down as well as up, depending on the performance of the investment portfolio. The Fund faces equity market, currency exchange rate, liquidity, credit and foreign investment risks. The equity market can be volatile, depending on equity price and foreign currency movement.
- The capital and returns are not guaranteed. Investments in foreign equities are subject to high market risks, comprising equity and currency exchange rate risks. Emerging equity markets may be more volatile than equity markets of well-established economies, and may also have liquidity risks. As Fund investments are subject to equity price and foreign currency movements, the unit price can be volatile and potential losses can be incurred.
- It is important to note that investing in health care sector equities entails higher risks. Malaysian investors also face currency risks when investing offshore: investors will face currency loss (gain) when the Ringgit appreciates (depreciates) against the foreign currencies (e.g. USD, etc).
- For risk management, the Fund adopts an active asset allocation strategy to manage overall market risks.

## IMPORTANT NOTICE

- This fund review is for illustrative purposes only. For further details of terms and conditions, please refer to the policy documents and sales illustration.
- The price of units may rise or fall and the performance of the fund is NOT GUARANTEED.
- The choice of funds should be based on, among others, your tolerance to risk.
- The funds may be invested in Shariah compliance securities and the product is not designed pursuant to Shariah principles.
- Rebates and Soft Commissions – Any rebates received from brokers will be directed to the account of the funds. Notwithstanding the aforesaid, a licensed insurer may receive products and services by way of soft commissions provided always the services rendered relate to the management of the investment-linked funds and bring demonstrable and justified benefits to policy owners. Services received are in the form of research and advisory services, market and economic reports that assist in the decision making process relating to the funds' investment and the transaction is executed on the terms which are favourable for the funds.

The following are the brief description of the type of risks referred to in this fund review:

**Market Risk** – Risk that arises when the value of the fund's asset fluctuate due to changes in market factors, such as recession, political turmoil, interest rates, natural disasters, terrorist attacks, credit spreads and foreign exchange rates.

**Stock-Specific Risk** – Risk that arises when the value of the fund's asset in a particular stocks fluctuate and may affect the unit price of the fund adversely.

**Sector Risk** – Risk that arises when the value of the fund's assets are affected by changes in specific factors, such as business conditions and industry outlook.

**Company Risk** – Share prices of a stock fluctuate in response to circumstances affecting individual companies, such as financial performance, merger news or the loss of key personnel of a company.

**Dividend Policy Risk** – A significant deterioration in the fundamental of a company's business or a change in management policy resulted in the reduction or removal of the company's dividend policy.

**Shariah Status Reclassification Risk** – There is the risk that Shariah-compliant securities held in the portfolio of Islamic funds may be reclassified to be non-Shariah compliant in the twice yearly periodic review conducted by the SACSC, the Shariah adviser or the Shariah Boards of the relevant Islamic indices. In the event of such an occurrence, the Fund Manager will take the necessary steps to dispose of such securities. There also be an opportunity loss to the Funds due to the Funds not being allowed to retain any excess capital gains derived from the disposal of the non-Shariah compliant securities. The value of the Funds also be affected in the event of a disposal of the non-Shariah compliant securities at a price lower than the investment cost.

**Credit and Default Risk** – The returns on debt securities for example certain types of money market instruments such as commercial paper as well as company bonds and government bonds, all depend on the continuing ability of the issuing company or government to service the interest payments and repay the loan at maturity. The level of credit risk depends on the likelihood of the company or government that issued the bonds defaulting on its financial obligations or reduced credit rating of the issuer. Default risk refers to risk of loss in value due to the default of the issuer.

**Interest Rate Risk** – This affects money market instruments and fixed-rate assets such as bonds where the trading value is affected by changes to interest rates. Typically, the trading value of a bond will fall when interest rates rise and rise when interest rates fall.

**Single Issuer Risk** - This risk refers to risk inherent at a specific issuer with potential losses that are substantial to affect the value of the investments arising from the default of a single issuer or issuer group.

**Currency Exchange Rate Risk** – Risk that fluctuation in the foreign currency against Ringgit Malaysia may have impact on the value of the fund's asset.

**Liquidity Risk** – Liquidity risk refers to the inability to readily realize the fair value of an investment due to the inability to sell the asset in the market quickly. In general, investments that are not traded in an organised market such as exchanges or broker/dealer market tend to be less liquid and are defined for this purposes as not readily realisable.

**Inflation Risk** - This generally applies to assets and funds that invest into such assets that provide steady but low levels of growth or income and reflects the probability that the value of the assets or income will be reduced as inflation shrinks its relative value. The higher the level of inflation, the quicker the relative value (or put another way, the purchasing power) of the asset, or income produced by the asset, will reduce.

**Political Risk** - Financial markets run in a regulated environment. Government or regulators can change the rules which then affect the value of assets based in those countries, particularly in less developed countries. Example of this are the application of economic sanctions if a government nationalises a company or industry.

**Exchange Rate Risk** - This risk results from the changes in the relative price of one currency against another. It affects assets that are valued in, or have a value derived from assets priced in a currency other than Ringgit. For example, funds may be denominated in Ringgit but invest in assets denominated in US dollar. The rate of exchange between Ringgit and every other currency is constantly changing and the level of exchange rate is determined by the speed and extent of those changes. Typically, if an asset has a stable price in US dollar but the value of Ringgit increases relative to the US dollar, it will cause the relative Ringgit denominated value to fall.

**Country/Regional Risk** - The changes in events, such as political upheaval, financial troubles, or natural disasters will adversely affect the value of securities issued by companies in foreign countries or regions. Country/Regional risk is generally high in emerging markets.

**Foreign Investment Risk** – Risk that arises when the value of the fund's asset invested in foreign markets fluctuate in response to the country-specific factors.
