Invest in Zurich Investment-Linked Funds Today!

You can invest in any one or combinations of Zurich investment-linked funds through the purchase of any one of our investment-linked plans. The following funds are available to suit your investment objectives, risk profiles and investment horizons:

Malaysian Funds

Name of Fund	Zurich Growth Fund																																		
Features of Fund																																			
Investment Objective	The Zurich Growth Fund ("The Fund") is an equity fund, which aims to provide capital appreciation over the medium to long-term, through a diversified, growth-oriented equity portfolio.																																		
Investment Strategy & Approach	The Fund invests predominantly in Malaysian equities and equity-related securities, with above-market average growth potential. The Fund adopts an active asset allocation strategy, and invests in a diversified equity portfolio using a combination of top-down, bottom-up, fundamental, quantitative and technical methods. The Fund may also invest a portion of the portfolio in fixed income securities, cash and short-term money market instruments, for capital preservation.

Name of Fund		Zurich China Edge Fund	
Features of Fund			
Investment Objective	The Zurich China Edge Fund ("The Fund") is an equity fund, which aims to provide capital growth over the medium to long-term, through investment in equity and equity-related securities (China equities) of companies which are headquartered and/or listed in or have a substantial business exposure to the People's Republic of China.		
Investment Strategy & Approach	The Fund will invest its assets in the Schroder International Selection Fund (ISF) - China Opportunities ("The Underlying Fund") for exposure to China equities. The Underlying Fund uses an active fundamental investment strategy to invest in China equities. Within this strategy, Schroder Investment Management Limited ("Schroder") places primary emphasis on their capability to generate investment insights through bottom-up research leveraging on the extensive investment expertise in the region.		
Asset Allocation	Asset Class	Range (% of NAV)

Performance over 10 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are provided on the basis that net income is reinvested. Data are not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the Total Expense Ratio and including the impact of any performance fees if applicable.

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark.

All figures represent cumulative returns.
Source: Schroders as at 31 December 2024

Risks	<ul style="list-style-type: none"> • The Fund's unit price may go down as well as up, depending on the performance of the investment portfolio. The Fund faces equity market, currency exchange rate, liquidity, credit and foreign investment risks. The equity market can be volatile, depending on equity price and foreign currency movement. • The capital and returns are not guaranteed. Investments in foreign (China) equities are subject to high market risks, comprising equity and currency exchange rate risks. Emerging equity markets may be more volatile than equity markets of well-established economies, and may also have liquidity risks. As Fund investments are subject to equity price and foreign currency movements, the unit price can be volatile and potential losses can be incurred. • It is important to note that investing in China entails high risks, as China's market volatility is higher than Malaysia. Malaysian investors also face currency risks when investing in China: investors will face currency loss (gain) when the Ringgit appreciates (depreciates) against the foreign currency (e.g. USD, Chinese Renminbi). • For risk management, the Underlying Fund's risk is actively monitored and managed with the use of PRISM (Portfolio Risk Investment Strategy Manager), Schroders' proprietary risk management system. PRISM is an internally developed risk analysis and reporting tool that identifies active risk, size exposure, beta, non-index positions and sources of risk by decomposing portfolios into stock specific/sector/country and characteristic exposures.

Name of Fund	Zurich Global Edge Fund																																
Features of Fund																																	
Investment Objective	The Zurich Global Edge Fund ("The Fund") is an equity fund, which aims to provide capital growth over the medium to long-term, through investment in equity and equity-related securities of companies worldwide whose financial characteristics shows high quality attributes.																																
Investment Strategy & Approach	The Fund will invest its assets in the Schroder International Selection Fund (ISF) - QEP Global Quality ("The Underlying Fund") for exposure to global equities. The Underlying Fund is an actively managed global equity fund designed to deliver higher long-run returns than the wider market. Analysing a universe of 5,000 stocks, the team uses a bottom-up process to construct a highly diversified portfolio of over 400 stocks.

• Fee Structure

There is no double counting of management fees between the Fund and the Underlying Fund, as the Fund Management Fee is charged only once in the unit price.

• Historical Performance

Notice: Past performance of the underlying fund is not an indication of its future performance

	1 mth	3 mths	1 year	3 years	5 years
	%	%	%	%	%
Schroder ISF-QEP Global Quality	-2.8	-0.4	13.8	9.3	41.4
MSCI World	-2.4	-1.0	17.5	17.2	61.5

Performance over 10 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are provided on the basis that net income is reinvested. Data are not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the Total Expense Ratio and including the impact of any performance fees if applicable.

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark.

All figures represent cumulative returns.

Risks	<ul style="list-style-type: none"> • The Fund's unit price may go down as well as up, depending on the performance of the investment portfolio. The Fund faces equity market, currency exchange rate, liquidity, credit and foreign investment risks. The equity market can be volatile, depending on equity price and foreign currency movement. • The capital and returns are not guaranteed. Investments in foreign equities are subject to high market risks, comprising equity and currency exchange rate risks. As Fund investments are subject to equity price and foreign currency movements, the unit price can be volatile and potential losses can be incurred. • It is important to note that investing in global equities entails higher risks. Malaysian investors also face currency risks when investing offshore: investors will face currency loss (gain) when the Ringgit appreciates (depreciates) against the foreign currencies (e.g. USD, etc). • For risk management, Underlying Fund's risk is actively monitored and managed with the use of PRISM (Portfolio Risk Investment Strategy Manager), Schroders' proprietary risk management system. PRISM is an internally developed risk analysis and reporting tool that identifies active risk, size exposure, beta, non-index positions and sources of risk by decomposing portfolios into stock specific/sector/country and characteristic exposures.

Growth of Hypothetical 10,000 USD Since Inception

Figures in the chart represent cumulative returns.

The Hypothetical Growth of \$10,000 chart reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses were deducted.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted and numbers may reflect small variances due to rounding.

Performance data current to the most recent month end may be obtained by visiting www.ishares.com or www.blackrock.com

Name	Zurich Health Care Fund																												
Features of Fund																													
Investment Objective	The Fund seeks to track the performance of a benchmark index that measures the investment return of health care stocks.																												
Investment Strategy & Approach	<p>The Fund is a 'feeder' fund that will invest its assets in the Vanguard Health Care ETF. The Vanguard Health Care ETF employs an indexing investment approach designed to track the performance of the MSCI US Investable Market Index (IMI)/Health Care 25/50, an index made up of stocks of large, mid-size, and small U.S. companies within the health care sector, as classified under the Global Industry Classification Standard (GICS). The GICS health care sector includes health care provider and services companies, companies that manufacture and distribute health care equipment and supplies, and health care technology companies. It also includes companies involved in the research, development, production, and marketing of pharmaceuticals and biotechnology products.</p> <p>The Vanguard Health Care ETF attempts to replicate the target index by seeking to invest all, or substantially all, of its assets in the stocks that make up the Index, in order to hold each stock in approximately the same proportion as its weighting in the Index.</p>

Until 30 September 2021, the underlying fund name was Vanguard Health Care Fund Admiral Shares.

<p>Risks</p>	<ul style="list-style-type: none"> • The Fund's unit price may go down as well as up, depending on the performance of the investment portfolio. The Fund faces equity market, currency exchange rate, liquidity, credit and foreign investment risks. The equity market can be volatile, depending on equity price and foreign currency movement. • The capital and returns are not guaranteed. Investments in foreign equities are subject to high market risks, comprising equity and currency exchange rate risks. Emerging equity markets may be more volatile than equity markets of well-established economies, and may also have liquidity risks. As Fund investments are subject to equity price and foreign currency movements, the unit price can be volatile and potential losses can be incurred. • It is important to note that investing in health care sector equities entails higher risks. Malaysian investors also face currency risks when investing offshore: investors will face currency loss (gain) when the Ringgit appreciates (depreciates) against the foreign currencies (e.g. USD, etc). • For risk management, The Fund will use the permitted asset allocation limit to manage the overall market risk. • Because ETFs are traded on an exchange, they are subject to additional risks.
<p>Other Information</p>	
<ul style="list-style-type: none"> • Target Market 	<p>For investors:</p> <ul style="list-style-type: none"> • Looking to participate in companies principally engaged in the development, production, or distribution of products and services related to the health care sector based in the United States. • Looking for capital appreciation rather than steady income stream. • Willing to accept a high level of investment risk. • Have a medium to long-term (typically 3 to 5 years) investment horizon.

<ul style="list-style-type: none"> • Exceptional Circumstances 	<p>The Company may choose to, without prior notice, suspend unit pricing and policy transactions if the Underlying Fund in which the Zurich Fund invested is temporarily suspended for trading.</p>

Name	Zurich Global Green Fund										
Features of Fund											
Investment Objective	<p>Zurich Global Green Fund ("The Fund") is an equity fund, which aims to track, before fees and expenses, the return performance of the MSCI World Climate Paris Aligned Ex Select Business Involvement Screens Index (the "Index"). The Index provides exposure to companies that are working towards a climate neutral economy, by seeking to align with the climate goals of the Paris Agreement on carbon reduction and the recommendations of the Task Force on Climate Related Financial Disclosures. In addition to seeking to achieve the investment objective of the Fund, the ICAV will also seek to offset the estimated carbon footprint of the Fund's portfolio of investments ("Carbon Offsetting"). Through Carbon Offsetting, the ICAV seeks to make a further contribution by the Fund to the attainment of the climate goals of the Paris Agreement on carbon reduction.</p>										
Investment Strategy & Approach	<p>The Fund is a 'feeder' fund that will invest its assets in the Zurich Invest ICAV (the "ICAV") - Zurich Carbon Neutral World Equity Fund for exposure to well-diversified portfolio of large and mid-cap equities in developed markets, which relate to the Index or its constituents.</p>

Risks

All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). For more information on risks, please see the section entitled “Risk Factors” in the Prospectus of the ICAV and Supplement of the fund.

- The Fund’s unit price may go down as well as up, depending on the performance of the investment portfolio. The Fund faces equity market, currency exchange rate, liquidity, foreign investment, carbon offsetting, derivatives and depository receipts risks. The equity market can be volatile, depending on equity price and foreign currency movement.
- The capital and returns are not guaranteed. Investments in foreign equities are subject to high market risks, comprising equity and currency exchange rate risks. As Fund investments are subject to equity price and foreign currency movements, the unit price can be volatile and potential losses can be incurred.
- Carbon Offsetting will be implemented through the purchase and cancellation of Verified Emission Reduction Certificates or VERs by Carbon Offsetting Intermediaries. There is no guarantee that techniques used by the Underlying Fund to offset the estimated carbon footprint will be achieved. The actual carbon footprint of the portfolio of investments of the Underlying Fund may therefore be higher or lower than the estimated carbon footprint due to circumstances beyond control of the ICAV or its delegates.
- It is important to note that investing in global equities entails higher risks. Malaysian investors also face currency risks when investing offshore: investors will face currency loss (gain) when the Ringgit appreciates (depreciates) against the foreign currencies (e.g. USD, etc).
- For risk management, The Fund will use the permitted asset allocation limit to manage the overall market risk.

<ul style="list-style-type: none"> • Basis & Frequency of Unit Valuation 	<p>Daily unit valuation. Unit price is net of transaction costs.</p>
<ul style="list-style-type: none"> • Exceptional Circumstances 	<p>The Company may choose to, without prior notice, suspend unit pricing and policy transactions if the Underlying Fund in which the Zurich Fund invested is temporarily suspended for trading.</p>

IMPORTANT NOTICE

- This fund review is for illustrative purposes only. For further details of terms and conditions, please refer to the policy documents and sales illustration.
- The price of units may rise or fall and the performance of the fund is NOT GUARANTEED.
- The choice of funds should be based on, among others, your tolerance to risk.
- The funds may be invested in Shariah compliance securities and the product is not designed pursuant to Shariah principles.
- Rebates and Soft Commissions – Any rebates received from brokers will be directed to the account of the funds. Notwithstanding the aforesaid, a licensed insurer may receive products and services by way of soft commissions provided always the services rendered relate to the management of the investment-linked funds and bring demonstrable and justified benefits to policy owners. Services received are in the form of research and advisory services, market and economic reports that assist in the decision making process relating to the funds' investment and the transaction is executed on the terms which are favourable for the funds.

The following are the brief description of the type of risks referred to in this fund review:

Market Risk – Risk that arises when the value of the fund's asset fluctuates due to changes in market factors, such as recession, political turmoil, interest rates, natural disasters, terrorist attacks, credit spreads and foreign exchange rates.

Stock-Specific Risk – Risk that arises when the value of the fund's asset in a particular stocks fluctuate and may affect the unit price of the fund adversely.

Sector Risk – Risk that arises when the value of the fund's assets is affected by changes in specific factors, such as business conditions and industry outlook.

Company Risk – Share prices of a stock fluctuate in response to circumstances affecting individual companies, such as financial performance, merger news or the loss of key personnel of a company.

Dividend Policy Risk – A significant deterioration in the fundamental of a company's business or a change in management policy resulted in the reduction or removal of the company's dividend policy.

Shariah Status Reclassification Risk – There is the risk that Shariah-compliant securities held in the portfolio of Islamic funds may be reclassified to be non-Shariah compliant in the twice yearly periodic review conducted by the SACSC, the Shariah adviser or the Shariah Boards of the relevant Islamic indices. In the event of such an occurrence, the Fund Manager will take the necessary steps to dispose of such securities. There also be an opportunity loss to the Funds due to the Funds not being allowed to retain any excess capital gains derived from the disposal of the non-Shariah compliant securities. The value of the Funds also be affected in the event of a disposal of the non-Shariah compliant securities at a price lower than the investment cost.

Credit and Default Risk – The returns on debt securities for example certain types of money market instruments such as commercial paper as well as company bonds and government bonds, all depend on the continuing ability of the issuing company or government to service the interest payments and repay the loan at maturity. The level of credit risk depends on the likelihood of the company or government that issued the bonds defaulting on its financial obligations or reduced credit rating of the issuer. Default risk refers to risk of loss in value due to the default of the issuer.

Interest Rate Risk – This affects money market instruments and fixed-rate assets such as bonds where the trading value is affected by changes to interest rates. Typically, the trading value of a bond will fall when interest rates rise and rise when interest rates fall.

Single Issuer Risk - This risk refers to risk inherent at a specific issuer with potential losses that are substantial to affect the value of the investments arising from the default of a single issuer or issuer group.

Currency Exchange Rate Risk – Risk that fluctuation in the foreign currency against Ringgit Malaysia may have impact on the value of the fund's asset.

Liquidity Risk – Liquidity risk refers to the inability to readily realize the fair value of an investment due to the inability to sell the asset in the market quickly. In general, investments that are not traded in an organised market such as exchanges or broker/dealer market tend to be less liquid and are defined for these purposes as not readily realisable.

Inflation Risk - This generally applies to assets and funds that invest into such assets that provide steady but low levels of growth or income and reflects the probability that the value of the assets or income will be reduced as inflation shrinks its relative value. The higher the level of inflation, the quicker the relative value (or put another way, the purchasing power) of the asset, or income produced by the asset, will reduce.

Political Risk - Financial markets run in a regulated environment. Government or regulators can change the rules which then affect the value of assets based in those countries, particularly in less developed countries. Example of this are the application of economic sanctions if a government nationalises a company or industry.

Exchange Rate Risk - This risk results from the changes in the relative price of one currency against another. It affects assets that are valued in, or have a value derived from assets priced in a currency other than Ringgit. For example, funds may be denominated in Ringgit but invest in assets denominated in US dollar. The rate of exchange between Ringgit and every other currency is constantly changing and the level of exchange rate is determined by the speed and extent of those changes. Typically, if an asset has a stable price in US dollar but the value of Ringgit increases relative to the US dollar, it will cause the relative Ringgit denominated value to fall.

Country/Regional Risk - The changes in events, such as political upheaval, financial troubles, or natural disasters will adversely affect the value of securities issued by companies in foreign countries or regions. Country/Regional risk is generally high in emerging markets.

Foreign Investment Risk – Risk that arises when the value of the fund's asset invested in foreign markets fluctuate in response to the country-specific factors.

ETF Risk - The Fund's ETF Shares are bought and sold on the secondary market at market prices. Although it is expected that the market price of an ETF Share typically will approximate its net asset value (NAV), there may be times when the market price and the NAV differ significantly. Thus, you may pay more or less than NAV when you buy ETF Shares on the secondary market, and you may receive more or less than NAV when you sell those shares.

Trading of the Fund's ETF Shares may be halted by the activation of individual or market wide trading halts (which halt trading for a specific period of time when the price of a particular security or overall market prices decline by a specified percentage). Trading of the Fund's ETF Shares may also be halted if (1) the shares are delisted from NYSE Arca without first being listed on another exchange or (2) NYSE Arca officials determine that such action is appropriate in the interest of a fair and orderly market or for the protection of investors.
